

I strongly support XM's right to broadcast locally oriented traffic & weather which is being opposed by NAB's petition 04-160. I urge you to reject this bill. I feel that this service is beneficial due to the fact that it is much more indept than what local am & fm stations offers. It has also been extremly beneficial for when we travel because we can pick up the weather & traffic in various other cities as well as our own. It is also a pay for subscription service and I feel that the NAB should keep their hands away from our rights to hear what we want. The quality and quickness of the stations XM provides is out of this world. No lawmaker should have a right to infringe on our rights.
